Seeking Mobile Application Developer and Software Engineering Roles

PROJECTS

Groomio: Salon Booking Platform with AI Hairstyle Suggestions | *Mobile salon booking platform with AI-driven hairstyle recommendations.*

- Integrated a face-shape analysis model via REST APIs to provide real-time hairstyle recommendations, enhancing user engagement through personalized salon booking experiences.
- Architected a microservices-based backend deployed on DigitalOcean, ensuring high availability and independent scalability for core booking and AI services by using multiple droplets for multiple services.
- Implemented CloudFlare R2 storage bucket of CloudFlare CDN with Supabase database for image assets.

Bookread - A Book Listening and Reading Application | *Flutter, Firebase, Text to Speech* 2025

- Book reading and listening application built with Firebase authentication and Firestore collections. Page-wise sentence segmentation for book listening implemented using flutter_tts library along with streaks, book management and sharing features and responsive user interfaces.

Android Mobile Development (48 Projects) | *Android Studio, Java/Kotlin* (Link) 2025

- Built 48 Android apps as coursework in Java/Kotlin covering Activities, Fragments, Services, SQLite, JSON parsing, Bluetooth, GPS, camera, notifications, and animations.

TECHNICAL SKILLS

Languages: Python, Java, Kotlin, Dart, SQL

Technologies: Flutter, Node.js, Express.js, REST API design, Supabase (PostgreSQL), Cloudflare R2, Firebase, API Integration, Clean Architecture, Provider, Reusable Widgets, Serialization, Hive, Sqlite, AWS

Tools: Git, GitHub, Prototyping, Figma to Design, Postman, Docker, Claude, Maestro, Selenium IDE

EXPERIENCE

Flutter Developer Intern Jul – Aug 2025
Code Alpha Remote

- Developed 4 cross-platform Flutter applications using Provider for state management, flutter package for sqLite, and hive databases and collaborated through Git

EDUCATION

COMSATS University Islamabad (Wah Campus) 2022 – 2026
BS Software Engineering

- CGPA: 3.70 / 4.00
- Applied Clean Architecture and SOLID principles to academic software projects, ensuring modularity and testability in large-scale Flutter applications.
- Honors: Prime Minister's Laptop Award for academic excellence (2025).

CERTIFICATIONS

- Oracle Certified – SQL Foundations and Next Level
- Boot.dev Course – Learn SQL through scenarios
- Flutter Development Certification
- Frontend Masters – Frontend Development Certification
